User Guide: South Donor Welcome Tool v6

Workflow Overview:

1. Upload Source List: Tool detects affinity columns and generates 'siteacronym'.
   The original column name is kept exactly as is for verification.
2. Review Prepped Data: Ensure 'siteacronym' correctly prefixes with 'CA-'.
3. Upload Append List: Matches on 'siteacronym' or 'acronym'.
4. Finalize & Save: The original affinity column is removed for Emma import.

- Logs: Download logs at any step to check for missing matches.
